- Replacement glass only for the PLS 6R red combination point and cross line laser.
- Replace damaged glass on your PLS laser affixed with just five screws.
- Please ensure your laser is operating and accurate before swapping glass inserts.

Product overview: PLS 6R Replacement Window Glass Insert

PLS® Laser Levels are durable professional-grade tools that are made for reliability in harsh construction environments, but even the most rugged laser level can have its glass broken when dropped from a high enough distance. To keep contractors on schedule, Pacific Laser Systems, a Fluke company, introduces PLS Laser Level Replacement Glass Inserts, new housing glass inserts that offer a quick in-field solution to broken laser level glass.

With the new PLS HGI glass inserts, contractors can replace broken glass on their PLS laser levels on-site using a Phillips-head screwdriver, eliminating the need to take the laser level in for repair.

The glass inserts are available for PLS models 3R, 3G, 5R, 5G, 6R, 6G, 180R, and 180G.
